

Saumya Jain

NJ, USA | (973)281-2451 | saumyain1994@gmail.com | [LinkedIn](#) | [Portfolio](#)

AWS Certified Senior Software Engineer with 5+ years of experience architecting scalable, high-performance web applications. Expert in the modern JavaScript ecosystem (**React, Next.js, Angular, TypeScript**) and cloud-native solutions. Proven track record of leading frontend teams, modernizing legacy systems, and delivering enterprise-grade architecture. Adept at bridging the gap between complex backend systems (Java/Node.js) and responsive, user-centric interfaces.

TECHNICAL SKILLS

- **Front-End:** React.js, Next.js, Angular (v2+ to v18), TypeScript, JavaScript (ES6+), Redux, NgRx, RxJS, HTML5, SCSS, Tailwind CSS, Webpack, Micro-frontends.
- **Back-End:** Node.js, Express.js, Java, Spring Boot, RESTful APIs, Microservices.
- **Cloud & DevOps:** AWS Certified Developer (Associate), Docker, Kubernetes, OpenShift, Jenkins, CI/CD Pipelines, DynamoDB, S3, EC2.
- **Tools & Testing:** Jest, Karma, Jasmine, Selenium, Git, JIRA, SonarQube, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Virtusa Corporation (Client: PNC Bank) | Lead Software Engineer – Front End

Nov 2020 - Present

- Architected and maintained 5+ core Angular schematic libraries that serve as the foundational UI framework for PNC's web applications, enabling scalable and standardized development across distributed teams.
- Engineered server-side rendering (SSR) workflows using Next.js and TypeScript, modernizing legacy architectures and improving API response performance by 20%.
- Designed reusable UI component systems and enforced strict coding standards using Angular CLI and NgRx for complex state management, ensuring application consistency and scalability.
- Built and managed enterprise-grade CI/CD pipelines with Jenkins and Docker, integrating automated testing suites (Jest, Karma) to reduce production defects by 30%.
- Mentored junior developers and implemented Git flow best practices, improving overall team productivity and code maintainability by 25%.
- Collaborated with cross-functional teams to achieve a 90% resolution rate for business-critical features while authoring internal documentation to accelerate developer onboarding.

Mind Strength Inc | Full Stack Developer

May 2017 - Feb 2018

- Developed scalable enterprise applications using Angular, Java, and Spring MVC with a PostgreSQL backend, delivering robust solutions in an Agile environment.
- Optimized RESTful API interactions and enhanced data caching strategies, successfully reducing page load times by 25% and improving user retention.
- Created dynamic, responsive front-end components using JavaScript and Angular, integrated with SQL Server for seamless data handling.
- Established automated test coverage using Jasmine, Karma, and Selenium, improving application reliability and catching regressions early in the development cycle.
- Boosted development efficiency by leveraging npm libraries and modular architecture principles, streamlining the codebase for easier maintenance.

EDUCATION

New Jersey Institute of Technology (NJIT) | Newark, NJ

Master of Science, Computer Science | May 2020

Mody University | Rajasthan, India

Bachelor of Technology, Computer Science | May 2016

PROJECTS

- **Real-Time Gaming Architecture (React):** Developed a modular platform featuring real-time routing and interactive browser games, utilizing a React frontend and modular layout architecture.
- **Content Management System (CMS) & Auth Platform (Full Stack):** Built a feature-rich application using React, Java, MongoDB, and PostgreSQL, implementing animated navigation and secure Firebase authentication.

CERTIFICATIONS

- **AWS Certified Developer – Associate (DVA-C02) | Issued: Sept 2024**
